Office Action Summary	Application No. 10/722,922	Applicant(s) GAYLORD ET AL.	
	Examiner Peter R. Brown	Art Unit 3636	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

In view of the affidavit submitted by the applicant under 37 CFR 1.131, the previous rejection has been withdrawn and the following action taken.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the covering and supporting material must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,4-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Brophy.

Figures 1 and 2 show structure as claimed, including seat portion 1, a back portion 4 which may pivot to a horizontal position over the seat, and a armrest 5 which is movable between a first vertical position and a second lower position. Stops formed by the brackets 8,9 hold the armrest in the vertical position (page 1, lines 89-92), and stop 14 holds the armrest in the second, lower position (page 1, lines 100-102). The seat and back appear to be formed in a conventional manner with a frame covered by a support and covering material. Note that the two armrests are connected by the horizontal seat frame.

Claims 1,2,4-10,12-14,16,17,19-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Maresca.

Figures 3 and 7 show structure as claimed, including armrests adjustable between upper and lower positions, and held in the positions by stops 122,124. A covering material is supported by a tubular frame to provide the back and seat portions.
